Garland Neighborhood Management Academy Survey

In 2007, the Garland Neighborhood Management Academy was established to provide a forum for cross sector engagement and capacity building for Garland stakeholders. We have maintained our commitment to equipping stakeholders with tools and information to manage the future of their neighborhoods. As a result, we have increased awareness of city services and programs, contributed to leadership development, and connected neighbors across the Garland community.

Classes are provided along three education tracks – Citizen Engagement, Neighborhood Management, and Leadership Development. We know there are always opportunities to enhance our efforts. Let us hear from you.

What type of classes would be beneficial to develop and sustain great neighborhoods in Garland?
